

MUHAMMAD SAMI

Senior Full Stack Software Engineer

Karachi, Pakistan | +92 306-2219739 | s.m.sami125@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 6+ years designing and shipping scalable SaaS platforms, enterprise applications, and AI-powered products with React, Next.js, Node.js, NestJS, MongoDB, and PostgreSQL. Skilled in system architecture, REST API design, and cloud deployment, with 30+ full-stack applications delivered for international clients across healthcare, cybersecurity, e-commerce, logistics, and CRM.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, Redux, Zustand, Tailwind CSS, Material UI, Shopify Polaris, Razor View Engine, Astro
Backend	Node.js, Express, NestJS, ASP.NET Core, Flask
Databases	MongoDB, PostgreSQL, SQL Server, MySQL, Firebase, Supabase, Prisma, Redis
Cloud & DevOps	Docker, AWS (EC2, S3, DynamoDB, Lambda), GCP (Google Cloud Storage), DigitalOcean, Vercel, Netlify, Nginx, GitHub Actions, CI/CD
Architecture	REST APIs, WebSockets, Socket.io, SignalR, JWT, OAuth, RBAC, Microservices, Multi-tenant SaaS, System Design, Clean Architecture, SOLID Principles
Integrations	Stripe, PayPal, OpenAI APIs, AI Integrations, Dropbox, Google Cloud Storage, OAuth (Google, Facebook, Apple), Shopify, Gelato

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer — *Fiverr & Upwork*

Oct 2020 – Present

- Delivered 50+ custom full-stack web applications for clients worldwide, spanning healthcare, e-commerce, logistics, and CRM domains.
- Built enterprise SaaS products using the MERN stack, Next.js, NestJS, and PostgreSQL, from requirements gathering through deployment.
- Designed REST APIs, authentication, and real-time features including JWT/OAuth-based auth, RBAC, payment systems, and WebSocket-driven live updates.
- Built real-time chat systems and complex business/KYC verification dashboards for enterprise SaaS clients.
- Deployed and maintained applications on AWS, DigitalOcean, and Vercel, with CI/CD pipelines via GitHub Actions.

MERN Stack Developer — *Inskire Tech (Remote)*

Jun 2022 – Mar 2023

- Developed and maintained full-stack features using MongoDB, Express, React, and Node.js for production SaaS applications.
- Collaborated with cross-functional teams of engineers and designers to ship features on agile sprint cycles.
- Optimized application performance through query optimization, lazy loading, caching, and code splitting.

Full Stack Developer — *Inspon Tech*

Mar 2021 – Apr 2022

- Built small-to-mid e-commerce applications for business clients, specializing in custom Shopify apps, and developed several Shopify and Wix storefronts from scratch.
- Built and shipped web applications using JavaScript, TypeScript, React, Next.js, and Node.js for business clients.
- Designed database schemas and REST APIs supporting core product features across SQL and NoSQL databases.

Coaching Center Instructor — *Teaching*

~4 years

- Taught technical and academic subjects to students, developing strong communication, mentorship, and problem-solving skills.

FEATURED PROJECTS

- ThreatInsights (TIPortal)** — Cybersecurity CMS platform combining threat intelligence, continuous external attack surface monitoring, and proactive incident readiness (Pentest, Tabletop exercises) to protect organizations against evolving threats.
- Tappio** — Built individually from scratch (frontend + backend): a digital business card & portfolio SaaS with 10+ themes each, an availability/scheduling card with Google/Zoom API booking (7 themes), AI-powered profile generation via OpenAI, and Stripe/PayPal subscription billing. One of my largest solo-built products.
- Capital Investment Club (CIC)** — Operating network connecting founders, investors, assessors, and grantors; includes pitch-based fundraising, investor bidding with assessor assignment, a marketplace, KYC verification, and capital-flow tracking.
- B2B-Editor** — Large-scale B2B poster customization platform (Fullstack contributor) supporting 15+ editor types (Star Map, Voice Poster, Zodiac Editor, Love Map, Cartoon Poster, City Map, Greeting Card, Audiobook, Children's Book, and more), letting merchants customize colors, fonts, and UI per editor.

EDUCATION

Bachelor's in Software Engineering — UBIT, University of Karachi, Pakistan (2022)
